

The MediClick Suite of Solutions

MediClick Inc., an innovator in healthcare supply chain applications, serves more than 200 hospital organizations with software as a service (SaaS) - Web-based products delivered and accessed 12,000 times a day via the Internet.

The MediClick Suite of Solutions

- Comprised of three tools:
 - MediClick for the Supply Chain
 - MediClick for Contracts & Analysis
 - MediClick for Financials
- Fully integrated in a single database for the item file, vendor file and chart of accounts
- Reduced dependence on IT for support with SaaS maintenance model
- Eliminates the need for hardware or third-party software to manage applications
- All costs covered by monthly usage fee including license, support, hardware and enhancements

MediClick for the Supply Chain

- Designed for all hospital employees involved in supply chain and materials management: warehouse clerks and managers, requisitioners, buyers and the director of materials management (DMM).
- Full MMIS functionality including:
 - Electronic requisitioning and approval routing
 - Purchasing (including fax and EDI)
 - Inventory and warehouse management
 - Handheld tracking and par management
 - Reporting and analytics
 - Integrated invoice matching
- Interfaces simply with virtually any third party IT applications using MediClick Client Gateway technology (e.g. OR, Patient Accounting, Point of Use, etc.)
- Reduces manual work behind purchasing with fully integrated EDI capability directly through MediClick or using vendors such as Broadlane or GHX
- Handheld applications allow users to manage PAR levels, conduct physical inventories and track package deliveries
- Electronic requisitioning and approval routing puts control in the hands of end users and reduces customer service demands on materials management staff

- Intelligent approach to database design and reporting features makes it easy to enter information into the application, keep data organized and access reports with tools native to the system

MediClick for Contracts & Analysis

- Designed for employees focused on the hospital supply chain and financials, particularly the DMM, contracts manager and CFO.
- Ideal for materials managers who want to secure best contract prices on every purchase rather than relying on distributors or third-party services for pricing accuracy.
- Works seamlessly with MediClick for the Supply Chain.
- Synchronizes item file prices with GPO and manufacturer contract pricing to help users eliminate off-contract spend and negotiate the best available prices.
- Automates contract download and contract-to-item-file matching process to keep data clean and reduce time required for future synchronizations.
- Reduces manual input and management time with data automation.
- Maintains and monitors detailed contract information.
- Assigns and tracks distributor mark-ups to assess possible overcharging.
- Compares new items to all contracts and tiers, whether activate or inactive, and assigns appropriate discount.
- Alerts user to expiring contracts or contracts that need attention.
- Establishes cross-references between hospital and manufacturer item numbers.
- Tracks non-file item purchases against contracts to price for appropriate discounts.
- Identifies and eliminates off-contract purchases to highlight savings opportunities.
- Directs user to best GPO contract for off-contract items.
- Identifies and manages tier optimization opportunities.

MediClick for Financials

- Designed for senior managers, like the CFO and controller, responsible for reporting the hospital's highest level financial statements to the Board, bondholders, or the community. Also designed for day-to-day use by hospital accountants, financial analysts, AP clerks, and department heads.
- Comprised of feature-rich General Ledger, Accounts Payable, and Financial Report Writer.

- Features departmental reporting allowing department heads access to their expense reports and freeing finance staff from the burden of generating and distributing the reports.
- Provides flexible options with MediClick-developed Report Writer for financial statements, ad hoc reports, and dynamic MS Excel reports.
- Integrates with MS Excel throughout the product, allowing finance users to run dynamic reports, enter data, and conduct analysis using this familiar tool.
- Full General Ledger functionality, including:
 - Financial statement generation
 - Budget tracking
 - Integrated Report Writer and inquiry tool
 - Quick entry journal vouchers
 - Allocations
 - Project/Fund tracking
 - Drill-down into journal transactions
 - Integrated MS Excel add-in tools
- Full Accounts Payable functionality, including:
 - Vendor management
 - Invoicing
 - Payment processing
 - Bank reconciliation
 - Integrated Report Writer and inquiry tool
- Interfaces simply with virtually any third party IT applications using MediClick Client Gateway technology (e.g. Business Intelligence, Payroll, Patient Accounting, etc.)
